## ABOUT

**Who we are**

POWERED BY

**Why this toolkit**

Urban eco-evolutionary  
dynamics is a burgeoning

**How to use**

Use the above tabs to  
navigate to tools that will

who are part of an **National Science Foundation** funded **Research Coordination Network** focusing on urban eco-evolutionary dynamics. This toolkit was started in 2023 with the intention of more tools being added to it by other contributors.

field and interest is increasing across the globe. Many researchers want to conduct, collaborate on, and communicate their urban eco-evo research, yet barriers exist in allowing for this to happen at a global scale. This toolkit is to allow anyone across the globe to connect, collaborate, and communicate.

help you decolonize your research, find collaborators, trait mapping, conducting a global scale experiment, and engage in science communication and outreach.

For more information, please see (link TBD) for an open-access article published about this toolkit.
